

POCKETSMART AI • PHASE 7

Project Documentation Phase

Recording architecture, workflow, implementation details, and user-facing modules

Project Documentation Phase

Recording architecture, workflow, implementation details, and user-facing modules

1. Technical Documentation

The project guide documents the architecture, technologies, routes, milestones, development activities, UI modules, testing approach, and conclusion.

2. Architecture Documentation

Documentation area	Covered content
Architecture	Frontend UI, backend, Gemini AI layer, and external platforms.
Technology Stack	FastAPI, Gemini 1.5 Flash Pro, HTML/CSS, JavaScript/Jinja2, authentication/session components, and third-party platform sources.
API Routes	Planner routes, authentication routes, session routes, recommendation-details, history, startup, and application entry point.
UI Modules	Home page, testimonials, registration, login, dashboard, three planners, three recommendation pages, and recommendation history.
Testing Notes	Real-world cases, budget adherence, response quality, platform accuracy, prompt optimization, validation, and fallback handling.

3. API & Module Documentation

Document the planner routes, authentication/session routes, recommendation-details, history, startup, and the application entry point, together with the modular organization of routes, services/recommendation logic, and models.

4. UI Documentation

The guide identifies the home page, testimonials, registration, login, dashboard, planner pages, recommendation pages, and recommendation history as user-facing modules.

5. Final Project Summary

PocketSmart AI combines budget inputs, preferences, and optional images with Gemini-based recommendation generation and a web interface. The documented objective is a fast, personalized, budget-aware planning experience across home interiors, parties, and jewelry.

Phase Outcome

Documentation preserves how the system is structured and how users interact with it, making the project easier to explain, maintain, and demonstrate.

Source basis: supplied PocketSmart AI project guide. The reference YouTube video was provided by the user but could not be fetched in this environment, so no video-specific claims have been added.
